Subject Index of Volume 168

Adhesion
recent advances in molecular level understanding of adhesion, friction and lubrication, 161
Adhesive force
effects of humidity and tip radius on the adhesive force measured with atomic force microscopy, 13
Amorphous carbon films
structure and friction of amorphous carbon films of nanometer thickness, 27
Atomic force microscopy
effects of humidity and tip radius on the adhesive force measured with atomic force microscopy, 13
Atomic oxygen
influence of atomic oxygen on space tribology in a low earth orbit, 99

Biological molecular machine
a biological molecular machine: bacterial flagellar motor and filament, 189

Carbon film
microtribological improvement of carbon film by silicon inclusion and fluorination, 155
Carbon surfaces
nanotribology studies of carbon surfaces by force microscopy, 17
Contact electrification
contact electrification phenomena and powder surface treatments, 91

Diamond
effect of atomic-scale surface roughness on friction: a molecular dynamics study of diamond surfaces, 127
Diamond-like carbon
review of the tribology of diamond-like carbon, 143

Exoelectron emission
exoelectron emission: possible relation to seismic geo-electromagnetic activities as a microscopic aspect in geotribology, 135

Fluorination
microtribological improvement of carbon film by silicon inclusion and fluorination, 155
Force microscopy
nanotribology studies of carbon surfaces by force microscopy, 17
Friction
recent advances in molecular level understanding of adhesion, friction and lubrication, 161
Frictional anisotropy
superlubricity and frictional anisotropy, 121

Gaseous wear products
gaseous wear products from perfluoropolyether lubricant films, 31
Geotribology
exoelectron emission: possible relation to seismic geo-electromagnetic activities as a microscopic aspect in geotribology, 135

Hard disks
some head–disk interface tribology issues for near-contact recording on hard disk drives, 37
Head slider mechanisms
state of the art for nanospacing flying head slider mechanisms in magnetic recording disk storage, 43

Lubricant molecules
adsorption and configuration of lubricant molecules on overcoat materials, 167
Lubrication
recent advances in molecular level understanding of adhesion, friction and lubrication, 161
Lubrication equation
estimation of gas film lubrication effects beneath sliding bushings of microrotors using a molecular gas film lubrication equation, 175

Magnetic recording disks
state of the art for nanospacing flying head slider mechanisms in magnetic recording disk storage, 43
tribochemical reactions of very thin layers on magnetic recording disks, 85
Micromachining
silicon micromachining and micromachines, 181
Microrotors
estimation of gas film lubrication effects beneath sliding bushings of microrotors using a molecular gas film lubrication equation, 175
Microtribology
microtribology today and tomorrow, 1
triboscopy: a new quantitative tool for microtribology, 7

Nanoscale indentation
mechanism of nanoscale indentation, 109

Overcoat materials
adsorption and configuration of lubricant molecules on overcoat materials, 167

Perfluoro-polyether lubricant films
gaseous wear products from perfluoropolyether lubricant films, 31
Powder surface treatments
contact electrification phenomena and powder surface treatments, 91

Rotating disks
the flow of thin lubricant films on rotating disks, 21

Silicon
silicon micromachining and micromachines, 181

Silicon inclusion
microtribological improvement of carbon film by silicon inclusion and fluorination, 155
Slider bearings
head–disk interaction in gas-lubricated slider bearings, 49
Sliding bushing
estimation of gas film lubrication effects beneath sliding bushings of microrotors using a molecular gas film lubrication equation, 175
Space tribology
influence of atomic oxygen on space tribology in a low earth orbit, 99
Superlubricity
superlubricity and frictional anisotropy, 121
Surface conformity
effect of surface conformity on friction, 105
Surface roughness
effect of atomic-scale surface roughness on friction: a molecular dynamics study of diamond surfaces, 127
Thin-film media
tribology of thin-film media in both flying and sliding modes, 59
wear characteristics in thin-film media, 77
Thin layers
tribochemical reactions of very thin layers on magnetic recording disks, 85
Thin lubricant films
the flow of thin lubricant films on rotating disks, 21
Triboscopy
triboscopy: a new quantitative tool for microtribology, 7

Wafer-handling systems
particulate-contamination-free wafer-handling systems for gas, liquid and vacuum environments used in a 64 Mbyte dynamic random-access memory process, 115
